Support & Endorsement of the Declaration of Lima on Pain in Childhood

Pain in childhood is known to have negative effects on the physical and emotional well-being of children, and at times the impact persists into their adulthood. Hence the recognition and development of frameworks is crucial in the holistic and appropriate management of pain in the paediatric population.

The Declaration of Lima on Pain in Childhood is a comprehensive framework drawn up by the collective efforts at the 14th Latin American Congress on Pain (FEDELAT), the 18th Ibero-American Meeting on Pain and the 19th Peruvian Congress on Pain. The Association of Southeast Asian Pain Societies (ASEAPS) supports and endorses the Declaration of Lima on Pain in Childhood.

Yours sincerely,

Dr Ong Say Yang
President, ASEAPS
